

# Top 5 Benefits of Web Phone Functionality for UCaaS Platforms

Help your clients accomplish more with seamless, secure WebRTC.

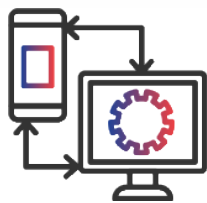

1

## Improve User Experiences

Simplify your customer's communications with high-quality voice in an all-in-one application.

2

## Enable Remote Work

Deliver the tools your customer's remote workers need to connect and collaborate from anywhere.

3

## Boost Network Reliability

Eliminate downtime and laggy calls with voice functionality that adapts to any network condition.

4

## Reduce Security Risks

Protect your customer's data with web calling features that adapt to your security infrastructure.

5

## Increase Affordability

Provide a simple, cost-effective platform for voice communications that supports BYOD initiatives.

## Before & After Adding Web Phone to Your Platform

### Before

- ✗ Lack of agility
- ✗ Unreliable call quality
- ✗ High voice costs

### After

- ✓ Greater mobility
- ✓ Crystal-clear calling
- ✓ Savings on telephony
